ANTI MELASMA CREAM

Reduces Freckles & Discoloration

Witade Whitening Facial Cleanser cleanses gently, evens out skin tone, retains skin's natural moisture and lightens up the skin. It is specially formulated to give you softer, clearer, fairer, younger and problem free skin.

KOJIC ACID

Is a natural metabolite produced by fungi that inhibits tyrosinase activity in melanin synthesis, which can be help reduce the intensity of breakouts and any resulting post-inflammatory hyperpigmentation. Lastly, as an antioxidant, kojic acid can help skin cells reverse the harmful effects of UV rays, pollution, and oxidative stress.

MAP

Is a stable derivative of vitamin C that the skin readily absorbs. MAP is known for its antioxidant properties and ability to brighten the skin. It's proven effective in reducing fine lines, wrinkles, improving skin tone and texture, stimulate collagen production and shielding against sun damage.

ALPHA ARBUTIN

Is a naturally occurring antioxidant and skin brightener that is naturally found in the bearberry plant. It reduces melanin formation, improving the appearance of age spots, freckles, melasma, and post-inflammatory pigmentation.
